COMPLETE YOUR HOME...

PERGOLA VENTI

multifunctional bioclimatic

We present you a unique and enclosure for patios and terraces - multifunctional, bioclimatic PERGOLA VENTI. Thanks to the roof's static resistance to snow, it is possible to use this patio system all year round. The multifunctional bioclimatic effect is mainly based on temperature regulation and air circulation in the inner space of the pergola. The temperature can be regulated by several independent systems. Through the openable transparent roof, the adjustable shading under the roof, the sliding side walls and also through the screening side blinds.

WHY CHOOSE PERGOLA VENTI?

- Custom made for your patio
- Remote-controlled opening of the roof sections supports natural air ventilation
- The integrated shading system is available in an electrically operated version
- The variable design allows retrofitting with side sliding walls and other accessories such as LED light strips, screen blinds and more
- Quick assembly, easy ordering
- Solid thick-walled profiles
- We provide expert installation, the system is also suitable for wooden buildings without loss of warranty
- The enclosure is developed and manufactured by Alukov a. s. - **Czech product**
